

MAP DOWSING - by John Living

John is retired; he was previously a Royal, Chartered, and Professional Engineer, specializing in earth and water; he was taught Dowsing as a junior officer in the Corps of Royal Engineers, and presently is the Executive Secretary of the Holistic Intuition Society.

Dowsing for Water

John has had great success in map dowsing for water on behalf of farmers - and has been referred by well drillers who wish to serve their clients best.

If you wish a Dowsing survey of your farm, just send John a copy of a map with your property lines marked, a description of the water needed (quantity and quality) together with a cheque for \$50 (Canadian if in Canada, else US\$) made payable to John Living, sending it to him at:

RR#1 S9 C6, Galiano Island, BC V0N 1P0, Canada

Distance is of no regard - 10 miles or 5,000 km is the same when map dowsing !

John will then locate all the water veins on the property, marking for each:

- Its course
- Direction of flow
- Quality of flow
- Quantity of flow
- Depth at boundaries

The best places for drilling wells will then be marked, together with:

- The depth of water
- The depth of drilling
- The quality expected
- The maximum quantity to be extracted under low flow conditions

John will then return the maps to you for your use on site.

Dowsing for Missing Persons

John will endeavour to locate missing persons or crashed aircraft - but be aware that if a missing person (or animal) does not wish to be found then Dowsing will not find them.

If you wish to locate such missing persons then send John:

- Full Birth Name
- Place & Date of Birth
- Present Name
- Recent photograph
- Piece of Hair (from brush/comb ?)
- Time and Place last known.

Together with a cheque for \$50 (as described above for well location).

If John is not able to get data then the cheque will be returned to you.
